About me

I'M Raffli Firmansyah. I'm 18 years old and I was born in Jember, 10th October 2001. I am interested in programming language such as : HTML, CSS, JavaScript, PHP, and C#. I've started learn about code when I was in Vocational High School. There I started to figure out the way the program built, then I keep learning code so that I understand how to build an application. I'm know as a active person, but I still stand that what I've began must be done as best as I can. I am able work individually or within a team setting cause I've been in both of those before.
